PROFESSIONAL SUMMARY

Business Analyst with strong expertise in Python, SQL, and Power BI, experienced in transforming large datasets into actionable business insights. Skilled in advanced SQL querying, KPI analysis, and interactive dashboard development. Passionate about leveraging data-driven strategies to optimise performance and support strategic decision-making.

TECHNICAL SKILLS

- Python
- Pandas & NumPy
- Git/GitHub
- SQL
- Power BI/ Tableau
- Excel
- PostgreSQL/MySQL
- Firebase
- Data Visualization
- Statistical Analysis
- EDA & KPI Analysis
- Data Reporting

WORK EXPERIENCE

Intern – Business Analyst (DenQr – Startup) Oct 2025 – Dec 2025

- Collaborated with stakeholders to gather requirements and translate them into data-driven solutions.
- Analyzed large datasets using SQL to generate actionable business insights.
- Built interactive dashboards and reports to track KPIs and support decision-making.
- Presented insights to clients, simplifying complex data into clear business recommendations.
- Performed data cleaning, analysis, and reporting using Excel, Pandas, NumPy.
- Created & Presented dashboards in front of clients so that they can understand easily.

PROJECTS

Online Food Ordering System June 2025 – Oct 2025

- Analysed order and payment data to identify customer behaviour, peak ordering hours, and revenue trends, helping improve operational decision-making.
- Computed key metrics such as daily orders, Average Order Value (AOV), and payment success rates using Pandas aggregations and NumPy calculations.
- Performed advanced SQL queries using joins and window functions to extract actionable insights from transactional data.
- Conducted EDA to identify top-selling menu items, category-wise demand trends, and restaurant-wise peak hours.
- Developed Power BI and Excel dashboards that improved visibility into restaurant performance and supported faster business analysis.

Mobile Sales Analysis Oct 2025 – Nov 2025

- Cleaned and pre-processed raw data by handling missing values, correcting data types, and removing duplicates, improving data accuracy.
- Built an interactive Power BI dashboard with dynamic slicers to analyse sales trends across brands, cities, models, and payment methods.
- Identified monthly sales patterns and payment-method contributions, supporting data-driven insights into customer purchasing behaviour.
- Translated complex datasets into clear visual reports for non-technical stakeholders.

EDUCATION

Bachelor of Technology (B. Tech) – Computer Science Engineering RGPV University Bhopal
CGPA: 7.72 / 10 Aug 2022 – July 2026

Senior Secondary (12th – PCM) MP Board, Bhopal
Percentage: 77.6% May 2021 – May 2022

CERTIFICATION

- Certification in Cisco **Data Analytics** Essential Program
- Certification in Cisco **Python** Essential Program
- Certification in Cisco **Cyber Security** Essential Program
