PROFESSIONAL SUMMARY

Backend Software Developer skilled in building and deploying scalable, real-time web applications. Experienced in payment gateway integration, REST APIs, WebSocket-based live systems, and secure AWS cloud deployment. Passionate about engineering efficient, reliable backend architectures that solve real-world business problems.

PROJECTS

DenQr – Online Food Ordering System | 🔗 June 2025 – Nov 2025

- Architected and developed a fully functional Online Food Ordering System for restaurants, streamlining the order management process.
- Integrated Razor pay to enable secure subscription-based payments, supporting recurring billing and real-time transaction verification.
- Implemented WebSocket's to provide real-time updates on both the admin and kitchen dashboards, ensuring instant order synchronization.
- Reduced staff workload by 40% by automating order management, payment tracking, and receipt generation.
- Enabled UPI-based online payments, allowing customers to seamlessly complete transactions through multiple platforms.
- Developed an automated receipt generation system, producing digital PDF invoices immediately after each confirmed order.
- Built a centralized admin dashboard for monitoring, tracking, and updating live orders with dynamic status changes.
- Improved user experience by introducing live order tracking and instant kitchen-to-admin communication.
- Gained hands-on expertise in technologies including Razor pay API, Webhooks, WebSocket's, QR Code generation, and PDF automation.
- Deployed application on AWS EC2 with Nginx and Guni corn for scalable hosting.

Complaint Management System | 🔗 Feb 2025 - May 2025

- Designed and developed a full-stack complaint management web application with HTML, CSS, JavaScript (frontend) and Python Flask (backend).
- Integrated Google Firebase for real-time database storage, authentication, and secure user data management.
- Incorporated role-based authentication for users and admins to ensure data privacy and secure access.

EDUCATION

Bachelor of Technology RGPV Bhopal
Computer Science Engineering, CGPA: 7.72/10 Aug 2022 – July 2026
Senior Secondary (12th – PCM) MP Board Bhopal
Percentage: 77.6 % May 2021 – June 2022

SKILLS

• Python	• SQL	• NoSQL	• Payment Integration	• Excel
• Flask	• JavaScript	• MySQL/Postgres	• WebSocket's	• HTML
• Pandas	• NumPy	• GIT/GitHub	• REST APIs	• CSS
• AWS	• Cloud Deployment	• Server Configuration	• Postman	• Tableau
• C++	• CRUD Operation	• Basic Linux	• DSA	• OOPS

CERTIFICATION

- Certification in Cisco Advanced **Python Essential** Program
- Certification in Cisco **Data Analytics Essential** Program
- Certification in Cisco **Cyber Security Essential** Program
